

# Thuan Nguyen Huu

INTERN BACK-END

**Phone:** 0936213851

**Email:** nguyenhuuthuan6392@gmail.com

**Address:** Nguyễn Chí Thanh, Phường Trà Nóc, Quận Bình Thủy, TP Cần Thơ

## SKILLS

Programming Language:	PHP, C#, Python, HTML, CSS
Framework:	Symfony, Wordpress, Joomla, Bootstrap
Database:	MySQL, SQL Server, MongoDB
Soft Skill:	Teamwork, Critical Thinking, Collaboration, Creativity, Passion
Foreign Language:	English - Basic Communicate
Other:	Git

## EDUCATION

2020 - 2024	<b>Can Tho University Of Technology</b> Major: Information System - GPA: 3.05/4
-------------	--

## WORK EXPERIENCE

October 2023 - December 2023	<b>Project for Student Management at Binh Minh High School - (Can tho University Of Technology)</b> Efficiently manage student affairs at Binh Minh High with a comprehensive system. Utilizing the robust Symfony framework for backend development, with features like seamless enrollment, attendance tracking, grade management, and customizable reporting tools for educators and administrators <ul style="list-style-type: none"><li>Performing back-end development using Symfony.</li><li>Designing innovative and scalable architectures, prioritizing performance, security, and maintainability.</li><li>Implementing tests to ensure high code quality, reliability and robustness.</li></ul> Technologies: Symfony, Doctrine, and other associated technologies.
March 2023 - May 2023	<b>Fresh Flower Shop Management Website - (Can tho University Of Technology)</b> Project for a fresh flower shop management website. Utilizing the PHP programming language and applying the principles of Object-Oriented Programming (OOP), the project's goal was to enhance the website's performance and security. <ul style="list-style-type: none"><li>Utilized PHP's capabilities to craft resilient backend elements.</li><li>Architected a scalable system framework, emphasizing performance and data security.</li><li>Executed comprehensive tests to uphold code integrity, reliability, and resilience.</li></ul> Technologies: PHP and associated technologies.

---

August 2022 - December 2022

**Building a Bus Ticket Registration Management Module - (Can tho University Of Technology)**

The Building a Bus Ticket Registration Management Module to create an efficient bus ticket registration management system, with features focused on building essential features such as registration management, ticket tracking, and customizable reporting.

- Engaging in C# backend development
- Crafting cutting-edge and adaptable architectures with a steadfast focus on optimizing performance, delivering rapid and effective results
- Meticulously conducting comprehensive tests to fortify code integrity, bolster reliability, and reinforce resilience.

Technologies: C# and associated technologies.
